Products: Artificial ceramic sand, also known as children's play sand, is mainly used for filling sand pits in indoor or outdoor kids' play areas. The product is made from calcium silicate, perlite powder, plant fibers, and organic pigments through high-temperature sintering. It is available in three sizes: 5mm, 8mm, and 1cm. Currently, it comes in six color options — white, yellow, blue, green, pink, and a mixed blend — all with full, glossy grains, and custom colors are also supported. After four generations of process upgrades, the sand is stable in form, sturdy and non-friable, washable, and resistant to dusting or fading. It is eco-friendly and non-toxic, has passed the international SGS test, and comes with a guaranteed two-year warranty.
